

Asheq Mahmud Chowdhury

I am a graduate in Computer Science and Engineering from Brac University with a strong foundation in web development and programming. I have hands-on experience with the MERN stack (MongoDB, Express.js, React, Node.js), Python, and other core CSE concepts. I am passionate about building innovative solutions and constantly improving my skills to stay up-to-date with the latest technologies in the field, including CMS frontend development and Shopify.

Work Experience

Trainee RTL designer at Semi Surfers

- Gained hands-on experience in RTL design using Verilog/VHDL.
- Performed chip verification and wrote test benches for design validation.
- Ran simulations to optimize RTL designs for functionality and timing.
- Conducted timing analysis and ensured designs met clock constraints.
- Collaborated with a team to solve design and verification challenges.
- Enhanced understanding of digital design principles and chip architecture.

CMS frontend developer

- Worked as a CMS frontend developer, creating and maintaining responsive websites using CMS platforms like Shopify.
- Collaborated with design and development teams to implement features and optimize website performance.
- Ensured seamless integration with backend systems.
- Optimized websites for user experience and performance across different devices.

Educational Background

Bachelor of Computer Science and Engineering

Brac University

Expected Graduation: January 2026

Relevant coursework: Software Engineering, Data Structures and Algorithms, Database Management Systems, Web Development, Digital Logic Design, Operating Systems, Computer Networks

CGPA: 3.60

Projects

TrainSwift

Tech Stack: HTML, CSS, JavaScript, React

A web application to book train tickets and view schedules with real-time updates and an interactive search feature.

The Lotus

Tech Stack: React, Tailwind CSS, Firebase, Node.js, Express, MongoDB

A full-stack marketplace for buying and selling cars with role-based dashboards and secure user authentication.

Hostel Rental System

Tech Stack: Tailwind CSS, Express, React, MongoDB

A web app for browsing, booking, and managing hostel room reservations with real-time booking and Firebase authentication.

Skills

Technical Skills

- MERN Stack Development (MongoDB, Express.js, React.js, Node.js)
- API Development and Integration (RESTful APIs, JSON, JWT)
- Frontend Development (React.js, JSX)
- Backend Development (Express.js, Node.js, Authentication)
- Database Management (MongoDB)
- Version Control (Git, GitHub/GitLab)
- Responsive Web Design (Tailwind CSS, CSS Flexbox, Grid)

Tools

- Version Control: Git, GitHub, GitLab
- Development Environment: VS Code, EDA Playground, Postman
- Package Managers: NPM, Yarn
- Database Management: MongoDB Atlas, MongoDB Compass
- Deployment Platforms: Heroku, Vercel, Netlify
-

Languages

- English (Fluent)
- Bangla (Fluent)
- Hindi
